

## WEATHER BREAKER™ MODEL 165

CROSS SECTION VIEW

### FEATURES

- Insulation value of R=15.3
- CFC 11 free polyurethane foam core
- Full 1-5/8" thick
- Thermal break between exterior and interior skins
- Available in white, brown, almond, sandtone, or gray colors

*General Doors incorporates the latest in polyurethane technology which offers the highest 'R'-value, per inch, of all competitive insulations, while providing superior adhesion and structural integrity.*

## MANUFACTURER

Doors shall be Weather Breaker Model 165 insulated steel sectional overhead type as produced by General Doors Corp., Bristol, PA.

Door sections shall be of steel/polyurethane/steel sandwich type construction, 1-5/8" thick, manufactured in a continuous process using CFC free foam yielding a calculated R-value of 15.3. Section design includes a thermal break to limit conductivity of heat and cold, two EPDM bulb seals between sections to prevent air passage, and a U-shaped flexible weather-strip with continuous retainer across bottom of door. Sections will be furnished with reinforcing struts as required to meet minimum 15 psf wind load requirement.

**Exterior skin** shall be hot-dipped galvanized commercial quality steel no less than .016" thick (26 gauge), flush appearance, and embossed with a wood grain texture.

**Factory finish** is a two coat baked-on polyester paint system; specify white, brown, almond, sandtone or gray exterior.

**Interior skin** shall be hot-dipped galvanized steel pre-painted white no less than .015" thick (26 gauge) reinforced with roll formed horizontal ribs. Inside skin of each section shall have continuous internal reinforcement for hardware attachment.

**Ends of sections** are closed with 16 gauge galvanized steel end caps.

## OPTIONS
